

* mkdir intro-to-node

cd intro-to-node

touch index.js

node index.js

* REPL (Read - Evaluation - Print - Loop)

node (to enter repl)

.exit or ctrl + C * 2 (to exit repl)

* const fs = require('fs');

Filesystem

fs.copyFileSync("file.txt", "file2.txt");

source

destination

now run node index.js

* NPM (Node - Package - Manager)

① npm init (create package.json) (initiate NPM)

* after I install a npm I will have a dependency in my package.json

* npm install superheroes

var superheroes = require("superheroes");

var mySuperHeroName = superheroes.random();

console.log(mySuperHeroName);
